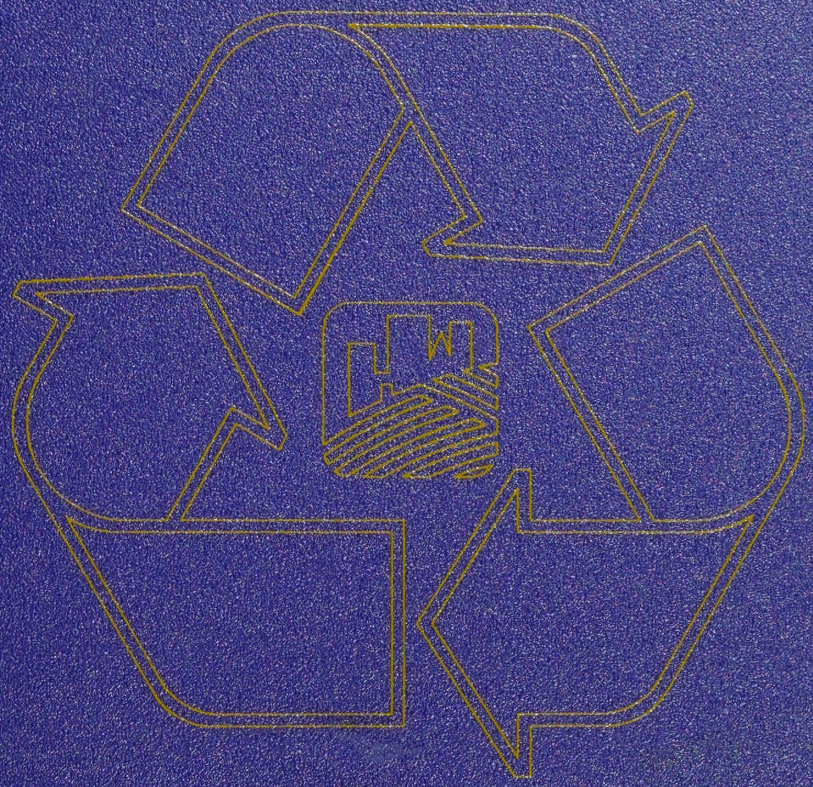
REGIONAL MUNICIPALITY OF HAMILTON - WENTWORTH



WASTE MANAGEMENT & RECYCLING DIRECTORY

The following is a list of government agencies and organizations that can be contacted to assist you with your waste management needs:

ASSOCIATION OF MUNICIPAL RECYCLING COORDINATORS (AMRC)
c/o Ortech International
2395 Speakman Drive
Mississauga, Ontario
L5K 1B3
(416)822-4111 Fax:(416)823-1446

The AMRC is an incorporated non-profit organization formed in 1987 by municipal waste professionals to facilitate the sharing of municipal waste reduction and recycling information and experience among municipalities.

BEST: BUSINESS ENVIRONMENTAL SUPPORT TEAM IN HAMILTON-WENTWORTH
c/o Business Advisory Committee

BEST helps business by assisting trade and business associations to identify environmental issues affecting their industry or profession, and helps them to obtain support, information and develop action. BEST is a volunteer coalition of business people, community groups and government support assisting small and medium sized businesses and associations to improve costs, identify opportunities and achieve environmental compliance.

BUSINESS ADVISORY COMMITTEE (BAC)
1 James Street South
Hamilton, Ontario
L8N 3V9
(416)577-6608 Fax: (416)528-8725

The BAC is a "not for profit organization", funded by the Regional Municipality of Hamilton-Wentworth and the Ontario Ministry of Industry, Trade and Technology, which provides advice to small business to help improve management, technical and marketing practices,etc., and free information and counselling on starting a small business and low cost seminars on business start-up, planning and marketing/sales.

HAMILTON PUBLIC LIBRARY
55 York Boulevard
Box 2700, Station A
Hamilton, Ontario
L8N 4E4
(416)529-8111 Fax: (416)

The Hamilton Public Library provides information on the environment to consumers, businesses, manufacturers, and the general public. The Central Library's Business Science, Technology and Government Documents Department is the hub of its environment service, including popular, "how to", legal, government, scientific, and technical issues. Books, journals, videos, and computerized information are available. The Libray is working with B.E.S.T. (Business Environmental Support Team) to strengthen support to small business, through special environmental information services geared to their needs.

MINISTRY OF AGRICULTURE AND FOOD
RR#1, 617 Hwy #53 East
Ancaster, Ontario
(416)527-2995

The goal of the Ministry of Agriculture and Food is to encourage the efficient and dynamic development of the total agriculture and food sector for the well-being of all people of Ontario. The Ministry's programs include marketing, quality standards, foodland preservation and improvement, education and research, advisory and technical services to farmers, as well as farm financial assistance.

MINISTRY OF THE ENVIRONMENT (MOE)
West Central Region
119 King Street West
P.O. Box 2112
12th Floor
Hamilton, Ontario
L8N 3Z9
(416)521-7640 Fax: (416)521-1601

THE MINISTRY OF THE ENVIRONMENT
Waste Reduction Office
40 St. Clair Avenue West
7th Floor
Toronto, Ontario
M4V 1M2
(416)325-4418 Fax: (416)314-5786

The Ministry is responsible for achieving and maintaining a quality of the environment, including air, water and land, that will protect human health and the ecosystem and will contribute to the well-being of the people of Ontario. By enacting and enforcing legislation such as the Environmental Protection Act (i.e. Regulation 309) the Ministry is able to maintain and monitor the state of the environment.

REGIONAL CHAIRMAN'S MESSAGE

Environmental awareness within the Region continues to be an important concern as we work together globally and locally for a cleaner, healthier environment.

We at the Region advocate environmental responsibility and have developed several programs to encourage local industries, businesses and institutions to seek better alternatives to the traditional methods of waste disposal.

References such as the Waste Management and Recycling Directory have been compiled to further promote the 3Rs of waste management - Reduce, Reuse and Recycle.

We believe that with continued cooperation between the Region and our industrial, commercial and institutional community, waste will be more effectively managed, making Hamilton-Wentworth a cleaner place in which to live, work and play.

Sincerely,

R.J. (Reg) Whynott
Regional Chairman

REGIONAL MUNICIPALITY OF HAMILTON - WENTWORTH WASTE MANAGEMENT & RECYCLING DIRECTORY

SEPTEMBER 1992

INTRODUCTION

Caring for the environment has prompted both the public and private sectors to explore new and improved ways of managing and recycling waste. Waste within the Region of Hamilton-Wentworth is generated from industrial, commercial, institutional, agricultural and residential areas.

The purpose of this directory is to:

- assist the industrial, commercial and institutional (IC&I), community with its waste reduction & recycling needs
- promote existing services and the development of new markets within the vicinity of the Region of Hamilton-Wentworth
- reduce material going to landfill and incineration for re-introduction back into the market place
- promote and encourage awareness of present and future environmental concerns
- assist the IC&I community meeting the waste diversion goals of 25% by 1992 and 50% by the year 2000 set by the Ministry of the Environment

Every effort has been made to include all companies and businesses involved in waste management and recycling in the Region of Hamilton-Wentworth and surrounding areas. We welcome any suggestions to make our information more complete.

The Region's Environmental Services Department does not warrant that any companies or businesses listed will serve your needs or deal with your companies concerns satisfactorily. Businesses are advised to make your own inquiries and arrangements with the companies or businesses directly.

The Environmental Services Department are also available upon request to provide your company with a detailed waste assessment. This assessment can provide you with a better understanding of the waste materials you have, and in turn allow us to make alternative suggestions for their disposal (recycling).

For further information on this project or any matter dealing with solid or liquid waste, please contact the staff of the Region's Environmental Services Department at (416) 546-4423 (IC&I Hotline).

REGIONAL MUNICIPALITY OF HAMILTON - WENTWORTH WASTE MANAGEMENT & RECYCLING DIRECTORY

ENVIRONMENTAL SERVICES
WASTE MANAGEMENT DIVISION
GENERAL INFORMATION

THIS SUMMARY IS PROVIDED FOR GENERAL INFORMATION ONLY. DETAILED INFORMATION CAN BE OBTAINED BY REFERRING TO THE REGIONAL SOLID WASTE BY-LAW #R80-098, OR BY CONTACTING THE SOLID WASTE MANAGEMENT SECTION'S SOLID WASTE HOTLINE AT 546-4417.

GARBAGE COLLECTION SERVICE

Household garbage collection in the Region of Hamilton-Wentworth is performed by each Area Municipality or its contractor. For inquiries concerning curbside garbage pick-up contact your Municipality:

Ancaster	648-4401	Hamilton	546-2785	Dundas	628-6327
Stoney Creek	643-1261	Glanbrook	679-4121	Flamborough	689-7351

REGIONAL DISPOSAL FACILITIES

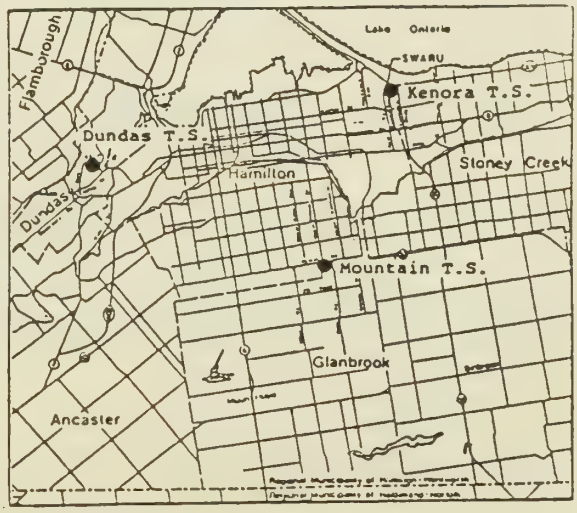
The Region no longer operates dumps which are open to the public. Instead, garbage may be taken to the Region's disposal facilities, called "TRANSFER STATIONS". The Transfer Stations are located at:

(A) Mountain Transfer Station:
Upper Ottawa Street and Kilbride Road,
Hamilton (South of Highway #53)

(B) Kenora Transfer Station:
Kenora Avenue and Bancroft Street,
Hamilton (North of Barton Street)

(C) Dundas Transfer Station:
Olympic Drive and King Street, Dundas

**** HOURS OF OPERATION:**
8:00 a.m. to 6:00 p.m. Mon.- Sat.
Closed: Sundays, Christmas Day,
New Years Day and Good Friday.



ACCEPTABLE SOLID WASTE ** All loads must be tarped. **

General residential, commercial, industrial and municipal refuse originating from the Hamilton-Wentworth Region, including kitchen waste, appliances, four car tires per day per resident, general trash, furniture, glassware, clothing, sweepings, tree clippings, crates, approved industrial by-products (in limited amounts), and most articles under four feet in length.

NON-ACCEPTABLE WASTE

Construction and demolition debris (ie. drywall and shingles), earth fill, broken concrete, and other inert materials, asphalt, tree stumps, construction timber, tires from industrial/commercial generators, wood products over four feet in length, bundles of metal strapping, and the like, abandoned motor vehicles, metal drums or barrels, agricultural waste, dead animals, liquid waste, untreated sewage, and hazardous waste as defined in RSO 1970, 824 as amended, pathological waste, pesticides and herbicides, snow, recyclable corrugated cardboard from industrial/commercial generators and other waste materials which may be deemed by the Commissioner of Transportation/Environmental Services to be "Non-Acceptable".

Cont'd...

COVERING LOADS
All solid waste conveyed to the Facilities shall be contained in fully enclosed vehicle bodies, or totally enclosed or covered in canvas, tarpaulins or nets, or other acceptable cover which is properly secured.

DEAD ANIMALS
Contact the local S.P.C.A. or a local Rendering Company

LIQUID WASTE
Refer to the "Liquid Waste Removal" Section in the Yellow Pages of the Bell Canada Directory- (or call Regional Offices of the Ministry of the Environment at 521-7640).

SEPTIC WASTE
Septic Waste generated from recreational vehicles may be discharged at the Mountain Transfer Station or the Woodward Avenue Sewage Treatment Plant. A charge of $7.00 + G.S.T. applies.

INDUSTRIAL/COMMERCIAL DISPOSAL & RECYCLING
Contact the Region at 546-4439 to find out about existing markets for your wastes.

RADIOACTIVE WASTE
Contact the local branch of the Ministry of the Environment 521-7640.
(Smoke detectors are not classified as radioactive waste and can be disposed in regular garbage).

RECYCLABLES (BLUE BOX) COLLECTION SERVICE
Recyclables (newspaper, glass bottles and jars, food and beverage cans, 2 litre Pet plastic pop bottles, aluminum pie plates, plastic bottles and jugs, telephone books, glossy magazines, clean grocery bags and corrugated cardboard) are processed in Hamilton-Wentworth Region by Third Sector Recycling. For inquiries concerning pick-up of Blue Box materials in Ancaster, Dundas, Flamborough, Hamilton and Stoney Creek, contact Third Sector at 528-9287/9664. In Glanbrook, contact Egger Excavating at (416) 774-3789. Blue boxes may be obtained by contacting the Recycling Hotline at 546-2157.

RECYCLING DEPOTS
Blue box recyclables may be brought to any Transfer Station, during regular operating hours, and deposited in the blue bins.

HOUSEHOLD HAZARDOUS WASTE DEPOT (H.H.W Depot)
The H.H.W. Depot is a service open to residents of the Region. The Depot is open every Saturday from 9am-5pm, and is located at 239 Lottridge St. N. in Hamilton. The Depot accepts wastes such as used motor oils, old paints, pesticides, batteries and propane cylinders. Asbestos is also accepted by special arrangement with Hotz Environmental (527-9266). Radioactive waste, biological wastes, PCBs, explosives and ammunition are not accepted at the depot. Commercial/industrial generators do not qualify for this free service.

The waste products generated from construction and demolition industries are diverse in nature and quite plentiful. A general definition of C & D debris is:

> *"uncontaminated solid waste resulting from the construction, remodelling, repair and demolition of structures and roads, with such waste including bricks, concrete, soils, rock, wood, wall coverings, plaster, drywall, plumbing fixtures, insulation, roofing shingles, asphalt pavement, glass, plastics, etc." (Biocycle July/90 p.57).*

Some of the materials found in C & D debris originate from many sources. The following list is an example of such debris and their sources:

Waste Type	Source
Rubble	Dirt, bricks, cinder blocks, concrete
Asphalt	Roads, bridges, parking lots
Tar-based materials	Shingles, tar paper
Ferrous metal	Pipes, roofing, flashing, steel
Non-ferrous metal	Aluminum, copper, brass, stainless steel
Untreated wood	Framing, scraps
Treated wood	Plywood, pressure-treated, creosote-treated
Glass	Windows, doors
Plastic	Vinyl siding, doors, windows

Many new end-use markets can be created by source separating these materials and re-introducing them into mainstream industries. The chart below is an example of some end-use markets:

Waste Type	End-use
Dirt	Soil, soil, conditioner, landscaping, landfill cover
Bricks	Masonry, landscaping, ornamental stone
Concrete, rocks	Fill, roadbeds
Tar-based materials	Mixed with asphalt for resurfacing
Ferrous & non-ferrous metal	Scrap metal buyers
Glass, plaster	Aggregate fill, asphalt
Wood	Fuel, landscaping, compost bulking agent, animal bedding, building products
Cardboard	Fuel pellets

* (Resource Recycling Dec./90 p.66 & 67)

Commercial food wastes are generated by retail outlets, hotels, restaurants, airlines, institutions, and food manufacturing and distribution companies. Food wastes can be in the form of trim from produce, flower cuttings, baked goods, deli materials, dairy or frozen products, and prepared meats.

Food that is safe and still suitable for human consumption, but cannot be sold for marketing reasons, can be donated to social agencies such as food banks or hostels. Export to foreign countries as food relief is also an option. Food wastes that are not suitable for human consumption can be diverted from landfill in a number of ways: farmers may use this food for animal feed or agricultural land use.

Composting is an alternative for industrial, commercial and institutional food wastes as well as domestic kitchens, and leaf and yard materials.

Food and vegetable oils are recycled into products such as soap and animal feed. Certain parts of fish, meat and fowl are considered delicacies and may find a market elsewhere in the world.

Company Information	Services	September 1992
B.J. BEAR GRAIN COMPANY LIMITED P.O. Box 99 Floradale, Ontario N0B 1V0 Warren Jack, Bill Bell (519)669-1750 Fax: (519)669-3818	Will pick up brewery wastes,bakery,fruit & vegetable waste and large volumes of food waste from industrial and commercial sources. Used for animal feed. May pay.

THE GREEN ALLIGATOR CO. 179 Woodbend Crescent Waterloo, Ontario N2T 1G9 Laura Archibald (519)747-2626 Fax: (519)885-1747	Manufacture and distributor of aerobic composters.	

The recycling of container glass products is quickly becoming an integral part of the glass manufacturing industry. Glass containers are virtually 100 percent recyclable where new glass containers can be made from old ones over and over again. Other glass types such as automotive, laminated glass, etc., currently have limited re-use, but may generate new opportunities for the future.

Manufacturers can acquire glass products to make new ones as containers for food, beverages, perfume, cosmetics, medicine and other consumer goods. The glass recycling process begins with the collection of used bottles and other containers. The glass is crushed into small pieces called cullet. The cullet is then mixed with melted glass, soda ash and limestone to produce new glass. Glass manufacturers can use as much as 25 percent cullet in their process, saving energy, landfill space and most importantly natural resources.

A major concern for glass recyclers and manufacturers is contamination. Common contaminants include: ceramics, china (eg. tiles, cups, plates, vases), windows, mirrors, drinking glasses, crystal, lab glass, cookware and light bulbs.

Glass recycling is finding a place with end-use markets beyond the container industry. Such examples are asphalt aggregates in place of sand in concrete (eg. glasphalt) and fiberglass insulation.

Ferrous and non-ferrous materials metals are reusable and recyclable materials. Factories and mills that produce metal that is put back into their process is called "home scrap." Goods made of metal that is discarded is called "obsolete scrap." Examples are old cars, railroad tracks, appliances, farm equipment and steel beams.

Steel is the most recycled material in Canada. All steel products are 100% recyclable and can be recycled indefinitely. For instance a car can be recycled into steel for use in a bridge, then the bridge can be recycled to make stoves, and then stoves into food and drink cans.

Steel food and beverage cans are 100% recyclable and implementation of a collection program in the work place easily recovers this valuable resource. Steel cans are made of steel with a protective tin coating. Recyclers are encouraged to densify cans for efficient and economical shipment.

Aluminum is 100% recyclable. Aluminum cans, T.V. dinner trays, pie plates, oven roasters, oven liners and household foil are all recyclable. Aerosol cans, aluminum tubes, wrap, cigarette foil, chip bags, yogurt lids and juice boxes are not recyclable.

Company Information	Services	September 1992
A.J. FRANK & SON INCORPORATED 706 Strathearne Avenue North Hamilton, Ontario L8H 7N8 Sheldon Frank (416)545-3095 Fax: (416)544-5464	Will pick up and/or accept large amounts of ferrous and non-ferrous metal. No contaminated or radioactive materials.

TWIN OAKS ENVIRONMENTAL LTD. 85 Lancing Dr. Unit Q Hamilton, Ontario L8W 2Z9 John Mitola (416)389-8030 Fax: (416)389-0820	Hauling and disposal of metal sludges.	

Waste oils may have been used as lubricants, heat dissipating or anti-rust agents. As a lubricant oil reduces friction and prevents wear. With heat dissipation oil cools parts and also reduces rust. Used motor oil comes from car service centers, maintenance facilities, military installations, industrial plants, farm equipment, and do-it-yourself oil changers.

Used motor oil may be classified as liquid industrial or hazardous waste. Hazardous oil waste can contain contaminants such as lead, cadmium, chromium, arsenic, and barium. Industrial generators, including service facilities, are required under the Ministry of the Environment regulation 309 to manage their used oil.

Used oil is recycled by re-refining. Re-refining motor oil involves the removal of water, light hydrocarbons, separation of lubricants from heavy oil and metals.

Company Information	Services	September 1992
AER-O-FLO ENVIRONMENTAL INC. 1175 Appleby Line, Unit B2 Burlington, Ontario L7L 5H9 Roy Budd, P. Eng. (416)335-8944 Fax: (416)335-8972	Will manufacture and provide oil separation and recycling equipment to industry.

The collection and recycling of paint and solvent waste generally involves a two step process. The first part involves delivery or pickup of the waste product from the household or site to a collection agency. The second step involves segregation and consolidation of paint waste to a recycler or approved disposal site.

Paint is separated into three groups: recyclable latex, recyclable alkyd and non-recyclable products (eg. contaminated paint, unknown paints, stains, epoxies, etc.). Recycled paint is tested for contamination. The useable paint is packaged into 45 gallon drums and sent to be reworked. It then is strained, treated and packaged in 20 litre pails for the market.

Recycled paint is most useful for exterior use, municipalities or large institutions for: exterior wood structures, exterior masonry surfaces, and fences. Paint cans are also recycled into reusable steel.

Company Information	Services	September 1992
AIMCO SOLREC LIMITED 425 Morobel Drive Milton, Ontario L9T 4N6 John Craig, George Kopulos (416)878-2627 Fax:(416)878-4728	Solvent recovery from paint, ink and solvent waste. Custom distillation. Transport and disposal of solvent, paint and ink waste and sludges in bulk or any size containers.

Paper products are processed from plant fibres of softwood and hardwood trees, shrubs, grasses and vegetable material. Commercial paper is made by either chemical or mechanical processes. High quality paper is produced by the chemical process and lower grade papers are made by the mechanical process. The major paper types include: fine paper, newsprint, magazine, corrugated containerboard, paperboard, industrial, household and specialty papers.

Newsprint is being recycled from old newspapers and is finding greater use in the newspaper publishing business. Magazines can be reused by schools, libraries, offices and other institutions before going back into the manufacturing process for recycling.

Corrugated cardboard is described as linerboards enveloping a corrugated medium (the fluting of middle layer). If it is in good condition then it may find use as shipping material. Damaged cardboard can be recycled into kraft paper for bags, cardboard containers, packaging materials, biodegradable supplies and paper towels.

Fine paper is used primarily in offices, schools and homes. Source separation and sorting is the key to producing good quality recycled paper. Fine paper can be recycled as 100% post-consumer paper.

Plastic is a synthetic material composed of carbon and hydrogen molecules. These molecules are tightly bound making plastic difficult to decompose. There are over thirty different types of plastics. The most common are polyethylene terepthalate (PET), used in soft drink bottles; high density polyethylene (HDPE) used for milk and juice jugs, shampoo bottles and motor oil containers; low density polyethylene (LDPE) used for grocery bags; polyvinyl chloride (PVC) used to make vegetable oil bottles; polypropylene (PP) used for margarine and yogurt tubs and polystyrene (PS) for styrofoam.

The Society of Plastic Institute (SPI) of Canada developed a coding system for plastics:

1 - PET	2 - HDPE	3 - PVC	4 - LPDE	5 - PP
6 - PS	7 - Other			

It is estimated that eighty-five percent of all plastic bottles are made from HDPE and PET. HDPE plastics can be reprocessed into pellets for bottle and sheet products. PET is being used in fiberglass, jackets, pillows, twine, rope, carpets and electrical parts.

The efficiency of recycling plastic can be increased if containers are rinsed and bottles with hazardous material labelled, segregated and disposed of in aregistered hazardous waste landfill site.

VULCAN INDUSTRIAL PACKAGING 260 Centre Street Patrolia, Ontario N0N 1R0 Gil Hunkeler (519)882-1820 Fax: (519)882-2627	Reconditioning, including washing and flame treating of 210 litre HDPE plastic drums.	

Tires and rubber are playing an important part in the recycling industry. Used tires are collected from dealers and then sorted for resale, retreaded, recycled or disposed. Recyclers cut or grind tires into suitable sizes for use in new products or mouldings. There are two different types of grinding processes that are used for the production of crumb rubber. One is cryogenic and the other is ambient. Cryogenic grinding involves using liquid nitrogen to freeze tires and shattering them in a hammermill. Ambient grinding is done at room temperature by shearing the tires under compression.

A number of uses have been found for crumb rubber. They include school yards, tennis courts, lawn bowling courts, waterproofing compounds and containers. It can also be combined with scrap or virgin plastic to make compounds for blue box or composter manufacture and rubberized asphalt.

Company Information	Services	September 1992
AARDVARK TRAILER RENTALS INC. P. O. Box 85100 Burlington, Ontario L7R 4K3 Jack Mayes (416)332-4343 Fax: (416)332-7521	Accept car and truck tires for recycling Minimum pickup in 45' trailer 1200 car or 500 truck tires. Leave trailer for customer to fill. U.S. Gov't. approved.

Wood waste can be acquired from several sources. Forestry sectors produce sawdust, end-cuts, chips, pallets and skids. Construction and demolition debris is a source for framing, lumber, end-cuts, plywood, particleboard, moulding and scraps. Other wastes include tree branches, brush, hydro poles, Christmas trees and railway material.

Waste wood that is found in good condition can be reused in building projects. Wood pallets can be repaired for reuse. Contaminants such as paints, varnishes or laminated surfaces may make the wood unacceptable for recycling. Acceptability depends on the process, its capability to remove contaminants and end-use markets.

Other uses of wood waste include chips or shavings for landscaping, animal feed, particleboard production, roofing materials and charcoal briquettes.

Company Information	Services	September 1992
ALL WASTE REMOVAL P.O. Box 73 Concord, Ontario L4K 1B2 Mike Thomas, Tom McGuffog (416)669-4340 Fax: (416)669-9945	Rental bins for wood waste (no sawdust). Large quantities only (40 cubic yard containers).

Textiles that can be considered reusable are clothing, upholstery, linens and towels. Most textiles are found to be either reusable or recyclable. Social organizations recover textiles through drop-bins and pickup services.

Used clothing comprises forty percent of collected textiles. These textiles are usually repaired, cleaned and redistributed to needy organizations locally and internationally. Paper, yarn and padding can be made from textile. Paper made from rag bond is used for printing and writing; wool can be rewoven and rag fibre can be used for padding, carpet and auto interiors. Rags have many uses in industry for machinery cleaning and spills.

BRONTE 3RS MATERIALS RECOVERY 2485 Speers Road Oakville, Ontario L6L 2X9 D. Richmond, T. Burroughs (416)335-6655 Fax: (416)825-3351	Multi-material recycling contractors. Conduct waste audits.	
C.D. SONTER MANAGEMENT INC. 1109 Britannia Road East Mississauga, Ontario L4W 3X1 Carmen Dodaro (416)564-4752 Fax: (416)670-0705	Waste management consulting, specializes in reduction, reuse, & recovery studies. Provides waste audits and action plans. Research for most cost effective methods	
C.D. SONTER WASTE MANAGEMENT 1109 Britannia Road East Mississauga, Ontario L4W 3X1 Carmen Dodaro (416)564-4752 Fax: (416)670-0705	Waste disposal analysis/auditing service Specializing in waste flow reduction & cost control. All types of recycling programs for business & industry.	

Company Information	Services	September 1992
CALGON CARBON CANADA 6303 Airport Road Mississauga, Ontario L4V 1R8 Paul Boron (416)673-7137 Fax: (416)673-8883	Consulting/engineering service. Equipment manufacturer/sales of trailer mounted carbon absorption systems, treatment chemicals. Lab analysis.	
CON-TEST DIV. CONTAMINATION 40 Old Kingston Road West Ajax, Ontario L1T 2Z7 Roy Hubbard (416)428-6671 Fax: (416)428-7703	Consulting/lab analysis service. Site rehabilitation. Testing, evaluation and certification of containment devices and high efficiency air filtration systems.	
CORUNDOL ENVIRONMENTAL LTD. 55 Vulcan Street Rexdale, Ontario M9W 1L3 Kelly Peckford, Chuck Langille (416)245-8338 Fax: (416)245-8321	Waste management services including laboratory analysis and testing of industrial or hazardous wastes.	
DANGEROUS GOODS CONSULTING INC. 98 Falconer Drive, Unit 72 Mississauga, Ontario L5N 1Y2 Len Nielsen (416)826-4856 Fax: (416)542-1073	Consulting service. Will train personnel in transporting dangerous goods. WHMIS training. IATA approved training.	
ECO CORP. 550 Queen Street East Toronto, Ontario M5A 1V2 Penny Mirams (416)360-4119 Fax: (416)360-8430	Environmental research and development company. Involved with scientific research.	

Company Information	Services	September 1992
ENERGETEX ENGINEERING P.O. Box 744 Waterloo, Ontario N2J 4C2 Ed Twardus, president (519)743-7191 Fax: (519)885-2738	Consulting, engineering and equipment manufacturer/sales of "Cleanfire" portable incinerators and portable burners used for waste oil.	
ENERGY PATHWAYS INC. 250 The Esplanade, Suite 402 Toronto, Ontario M5A 1J2 Joe Maclean (416)360-1323 Fax: (416)360-1706	Provides communications, research and management services for waste reduction, re-use, and recycling (ICI); municipal 3Rs; 3Rs public information and hazardous management.	
ENVISION RECYCLING 20 Warrington St.Box9, Depot 1 Hamilton, Ontario L8L 7T5 Valerie Carson (416)578-1101 Fax: (416)578-1254	Offer waste stream analysis to ICI generators wanting to establish recycling programs. Assist in government funding. Supplier of equipment and broker of secondary materials.	
HOTZ ENVIRONMENTAL SERVICES 239 Lottridge Street Hamilton, Ontario L8L 6W1 Heng Lim (416)545-2665 Fax: (416)545-7822	Environmental Engineering Consulting. Complete waste management services and and legislation compliance.	
IDG ENVIRONMENTAL SOLUTIONS INC. 238 Britannia Road East Mississauga, Ontario L4Z 1S6 Allan Jones (416)890-5530 Fax: (416)890-8969	Will evaluate waste disposal practices and recommend ways to reduce disposal costs.	

Company Information	Services	September 1992
IMET 58, 1271 Denison Street Mississauga, Ontario L3R 4B5 John Trought, president (416)477-4638 Fax: N/A	Specializes in air emission testing. In-plant and indoor air quality measurement and evaluation.	
LAIDLAW WASTE SYSTEMS (MRF) 245 Lottridge Street Hamilton, Ontario L8L 6W1 Jack Allison, Division Mgr. (416)549-4444 Fax: (416)549-8149	Provide complete waste management consulting services.	
M. R. BYRNE & ASSOCIATES LTD. 3050 Harvester Road, Unit #100 Burlington, Ontario L7N 3K7 J. Saweczko (416)632-8044 Fax: (416)632-2854	Environmental engineering including air quality control systems, water quality, collection, treatment and disposal facilities and material handling systems	
MONSERCO LTD. 6620 Kitimat Road, Unit 4 Mississauga, Ontario L8N 2B8 Grant Unsworth (416)821-1033 Fax: (416)821-1619	Consulting, engineering, equipment manufacture and sales. Health and safety concerning air quality and sound. Radiation safety in labs and hospitals.	
MULTIVIEW GEO SERVICE INC. 5566 Tomken Road Mississauga, Ontario L4W 1P4 P. Annan, president (416)629-0979 Fax: (416)624-9365	Developed subsurface profiling radar for mapping water table depth and cotaminant studies. Provide geophysical techniques for locating buried drums & plastic pipe	

Company Information	Services	September 1992
NALCO CANADA 1055 Truman Street Burlington, Ontario L7R 3Y9 Peter Westerterp (416)632-8791 Fax: (416)632-0849	Consulting service. Manufacturing/sales Water treatment chem. Engineered water treatment systems for comm./ind. pulp & paper petroleum & metal industries.	
NASOS POLYMER SYSTEMS 318 Arlington Ave. Toronto, Ont. M6C 2Z9 Nasos Steryannis (416)656-6188 Fax: N/A	Waste consultant specialist, specifically plastic materials. Design machinery for recovery of contaminated inter-mixed material	
ONTARIO WASTE EXCHANGE 2395 Speakman Drive Mississauga, Ontario L5K 1B3 Mary Jane Hanley (416)822-4111 Fax: (416)823-1446	Brokers for all types of industrial waste. Will do analysis of waste and provide free help if necessary.	
PAL-TECH ENGINEERING INC. 47 Elmhurst Drive Hamilton, Ontario L8T 1C5 Romeo Palombella (416)574-5889 Fax: (416)574-5889	An environmental engineering firm specializing waste managment and recycling investigations. Also performs engineering investigations.	
PAT'S DISPOSAL SERVICE LTD. 306 Lake Avenue North Hamilton, Ontario L8E 3A2 Gus Theriault, Michele Gagnon (416)573-0774 Fax: (416)578-5805	Recycling, waste management, demolition and recovery processes. Will provide waste audits/ plans for waste generators.	

Company Information	Services	September 1992
PHILIP ENTERPRISES INC. P.O. Box 423, Depot 1 Hamilton, Ontario L8L 7W2 William Graham, Ralph Clayton (416)544-6687 Fax: (416)548-8485	Complete waste management services including: consultation, testing, analysis, recycling, resource recovery, transportation and processing.	
POOLE-ADAMSON RESEARCH 1670 Bayview Ave., Suite 301 Toronto, Ontario M4G 3C2 Tery Poole (416)483-2252 Fax: (416)483-3918	Research and consulting group. Conduct studies on municipal curbside recycling: public behavior, rates, material classes. Consult & test communications materials.	
PROCTOR & REDFERN LIMITED 45 Goderich Road, Suite 201 Hamilton, Ontario L8E 4W8 Bob Tait (416)578-3040 Fax: (416)578-4129	All aspects of waste management (eg. 3Rs maximization plans.	
QUANTEX CHEMICAL INC. 29 Trillium Park Place Kitchener, Ontario N2E 1X1 Paul Binklay (519)748-5348 Fax: (519)748-5904	Industrial consulting services available including laboratory analysis.	
RONDAR INC. 333 Centennial Parkway Hamilton, Ontario L8E 2X6 Darvin Puhl, president (416)561-2808 Fax: (416)561-8871	Consulting/engineering service. Will do PCB management. Licensed to operate PCB decontamination unit. Licence to haul PCBs. Recycle & recover oil from electrical systems	

Company Information	Services	September 1992
SANEXEN ENVIRONMENTAL SERVICES 3027 Harvester Rd., Unit 202 Burlington, Ontario L7N 3G7 Victor Blackburn (416)681-3366 Fax: (416)681-1195	Will provide consulting services and engineering services pertaining to industrial cleaning and environmental protection.	
SANIVAN (1992) INC. 2250 Industrial Street Burlington, Ontario L7P 1A1 Roger Reiss (416)335-2321 Fax: (416)335-6897	Provide consulting services and engineering services pertaining to industrial cleaning and environmental protection.	
SCOTT TANK CLEANING COMPANY LTD 34 Queen West, Unit 4 Mississauga, Ontario L7N 1L4 John O'Hara, General Manager (416)278-0231 Fax: (416)278-3225	Consulting services available. Tank cleaning, inspection, testing, transport spill clean-up, site rehabilitation.	
SYDLO INC. 578 Minette Circle Mississauga, Ontario L5A 3B8 Syd Love (416)270-2282 Fax: (416)273-3815	Consulting and engineering service. Provide Sydlo Anaerobic Reactor for the treatment of industrial and municipal wastewaters.	
THE WASTEWATER TECHNOLOGY CTR 867 Lakeshore Road Burlington, Ontario L7R 4L7 Dr. Bruce Jank (416)336-4599 Fax: (416)336-4765	Consulting and engineering services. Develops and demonstrates new processes to treat industrial and municipal wastewaters.	

Company Information	Services	September 1992
WE RECYCLE CORPORATION Box 447,#19-342 Bronte St. S. Milton, Ontario L9T 5B7 Don Sexton (416)875-4929 Fax: (416)875-2583	Consulting service for industrial/comm. businesses. Will advise on type and # of containers needed. Also sells containers Will research end markets.	
WESTINGHOUSE CANADA INC. 505 Woodward Avenue Hamilton, Ontario L8N 3K2 Dave Beumo, A.J. Kaul (416)544-1234 Fax: (416)544-7509	Consulting and engineering pertaining to a wide range of PCB services. Provide turn-key packages for the removal of PCB equipment, for storage and disposal.	
ZENON ENVIRONMENTAL INC. 845 Harrington Court Burlington, Ontario L7N 3P3 John A. Coburn, president (416)639-6320 Fax: (416)639-1812	Engineering, lab analysis, equipment manufacturer/sales. Specialize in the treatment of wastes & wastewaters. Manufacture membrane-based systems.	

Company Information	Services	September 1992
BERGMAN BARREL & DRUM CO. LTD. 2460 Royal Windsor Drive Mississauga, Ontario L5J 1K7 Lloyd Stafford (416)823-1291 Fax: (416)822-1248	Steel drums bought and sold. Recondition to specifications. No linings. may pick up small amounts upon request.	
HAMILTON BAG & BARREL LIMITED 196 Cannon Street East Hamilton, Ontario L8L 2A8 Bill Levine (416)522-6414 Fax: N/A	Steel and fibre drums brought and sold (liners ok).Will look prior to accepting Drums must be free of hazardous material and contain less than 2.5cm of liquid.	
HOTZ & SONS DRUMS & WIPERS CO. 166 Ferguson Ave. North Hamilton, Ontario L8L 4Y4 Louis Hotz (416)545-2665 Fax: (416)527-3440	Pick up and/or receive fibre, steel, and plastic drums (used and reconditioned). Must be clean and toxic free with WHMIS label removed. Owner must sign release.	
LENNOX DRUM LIMITED 233 Fuller Road Ajax, Ontario L1S 2E1 Ray Lennox (800)263-7541 Fax: (416)427-4986	Will receive and/or pick up minimun 50 plastic (HDPE) or steel drums. No toxic materials. May pay.	
UNIVERSAL DRUM RECONDITIONING CO. 2460 Royal Windsor Drive Mississauga, Ont. L5J 1K7 Angelo Petrucci (416)822-3280 Fax: (416)822-1248	Will clean, recondition and paint metal drums and some plastics. Will pick up minimum of 50 drums or accept deliveries of small amounts. Drums must be empty.	

September 1992

Company Information	Services
VULCAN PACKAGING INCORPORATED 15 Bethridge Road Rexdale, Ontario M9W 1M6 Judy Rose (416)743-8682 Fax: (416)743-0609	Accept and/or pick up minimum 50 empty steel drums (no liners, no toxics). Recondition for owners.

Company Information	Services	September 1992
A-1 PRODUCTS CORPORATION 342 Bronte Street South Milton, Ontario L9T 5B7 D.B. Holliday, Michelle Pembry (416)875-2588 Fax: (416)875-2583	Blue Box Manufacturer.	
BASS PAPER AND PACKAGING 16 Falconer Drive, Unit #9, 10 Mississauga, Ontario L5N 3M1 Debbie Thomas (416)542-8484 Fax: (416)542-8477	Bags for barrel containers.	
BONAR INCORPORATED 111 Verulam Road, P.O. Box 88 Lindsay, Ontario K9V 4R8 Bill Gulka (705)324-0741 Fax: (705)328-1805	Roll-out type containers.	
BUCKHORN CANADA INC. 2775 Slough Street Mississauga, Ontario L4T 1G2 Mathew Busby (416)678-6545 Fax: (416)678-9482	Plastic recycling containers -boxes, paper and newspaper collectors etc.	
BUSCH SYSTEMS INTERNATIONAL INC. P.O. Box 300 Midhurst, Ontario L0L 1XO Craig Busch (800)565-9931 Fax: (705)722-8972	Blue box and desk side container manufacturer	

Company Information	Services	September 1992
FIRST BRANDS (CANADA) CORPORATION 305 Milner Avenue Scarborough, Ontario M1B 3V4 Jim Gracie (416)290-5000 Fax: (416)290-5777	Recycling centres, blue bags, desk side containers etc.	
GREIF CONTAINERS P.O. Box 784 Belleville, Ontario K8N 5B5 Paul Mead, Lowell Watson (613)968-6429 Fax: (613)968-2849	Plastic barrel type containers manufacturer (eg. pop-can recycling drums).	
I. WAXMAN & SONS LIMITED 500 Centennial Parkway N. Hamilton, Ontario L8E 2X5 Gary A. Waxman (416)560-1100 Fax: (416)560-4620	Containers supplied for all waste and/or scrap material.	
I.P.L. INC. 111 Advance Boulevard Brampton, Ontario L6T 4H8 Paul F. Smith (416)791-5895 Fax: (416)791-2500	Blue box-type container manufacturer.	
K.C.I. MECHANICAL INC. 7729 Eighth Line South Hornby, Ontario L0P 1E0 Jo-Anne Derrick (416)875-4600 Fax: (416)876-1854	Roll-out type container distributor. "Otto Bin."	

Company Information	Services	September 1992
POLYTARP PRODUCTS 350 Wildcat Road Downsview, Ontario M3J 2N5 Larry Brown (416)661-1750 Fax: (416)661-1757	Plastic bags for barrel type containers.	
RUBBERMAID CANADA INCORPORATED 2130 South Service Road West Oakville, Ontario L6L 5N1 Rick Green, John Spadafora (416)827-4661 Fax: (416)827-0748	Blue box-type container manufacturer.	
SCHAEFER SYSTEM INTERNATIONAL LTD. 140 Nuggett Court Brampton, Ontario L6T 5H4 Maureen Von Ameln, Paul Speed (416)458-5399 Fax: (416)458-7951	Roll-out type container manufacturer.	
TECHSTAR PLASTICS INC. 15400 Old Simcoe Road Port Perry, Ontario L9L 1L8 Cathy Arkles (416)439-6111 Fax: (416)985-0265	Plastic containers including boxes and roll-outs. Shipping containers, carts, trays, tanks, tote boxes and storage containers of many sizes and shapes.	
VICEROY, RUBBER & PLASTICS 707 Arrow Road Weston, Ontario M9M 2L4 Ron Bruhm (416)749-7070 Fax: (416)749-4440	Blue Box-type containers etc.	

Company Information	Services	September 1992
BRONTE 3RS MATERIALS RECOVERY 2485 Speers Road Oakville, Ontario L6L 2X9 D. Richmond, T. Burroughs (416)335-6655 Fax: (416)825-3351	Handle many different types of materials. Pick up from industrial, commercial, and institutional clients.	
CONMAC ENTERPRISES 95 West 4th Street Hamilton/Ontario L9C 3M8 Connie Prine-MacDonald (416)574-7136 Fax: (416)573-3499	A transporting company involved in hauling all recyclable materials as well as domestic waste. Warehouse # 573-3427	
RELIABLE RECYCLING LTD. 15 Biggar Avenue Hamilton, Ontario L8L 3Z3 Steven Foster (416)544-0640 Fax: (416)549-2119	Reliable Recycling provides recycling and support for all waste management needs. Reliable is also the largest recycler of cased glass bottles in Canada.	

Company Information	Services	September 1992
CANADIAN LASER PRODUCTS INC. 400 Matheson Blvd. Mississauga, Ontario L4Z 1N8 Kevin Kennedy (416)890-3600 Fax: (416)890-8269	Re-charges laser printer cartridges.	
F7 BUSINESS SYSTEMS 206 Locke Street South, Unit 1 Hamilton, Ontario L8P 4B4 Ben Piper (416)527-2611 Fax: (416)527-8892	Re-charges laser printer cartridges and provide toner supplies.	
I. WAXMAN & SONS LIMITED 500 Centennial Parkway N. Hamilton, Ontario L8E 2X5 Gary A. Waxman (416)560-1100 Fax: (416)560-4620	Full waste transfer & recycling facility. MOE permitted.	
I.N.I. CO. 1071 King Street West,Unit 108 Toronto, Ontario M6K 3K2 Paulette Williams (416)345-8460 Fax: (416)345-9044	Re-charges laser printer cartridges and mica printing. Other numbers: (416)949-4914 and fax (416)949-4915.	
LASER RECHARGE CANADA 303 Main Street West Hamilton, Ontario L8P 1J7 Sean Baird (416)546-5261 Fax: (416)546-0376	Re-charges laser printer cartridges.	

Company Information	Services	September 1992
LASER SAVE 785 Pacific Road, Unit #1 Oakville, Ontario L6L 6M3 Lora Machan (416)847-5990 Fax: (416)847-5991	Re-charges laser printer cartridges.	
RAPID PRINTER RE-INKING 113 Maple, Seymour Beach R R #3 Harrow, Ontario N0R 1G0 Doug Murray (519)738-6126 Fax: (519)252-9160	Recycle all types of printing ribbons used in office machines, printers, laser cartridges, bubble & ink jet cartridges, fax cartridges and data reels.	

Company Information	Services	September 1992
CANADIAN FOUNDATION FOR WORLD DEVELOPMENT 2441 Bayview Avenue Willowdale, Ontario M2W 1A5 Ken Davis (416)445-4740 Fax: (416)441-4025	A non-profit organization which provides aid to third world countries. Interested in all types of surplus equipment and supplies, especially building materials.	
INTERNATIONAL BUSINESS SUPPLIES 825 Denison Street Markham, Ontario L3R 5E4 Brian Szepaniak (416)479-6134 Fax: (416)478-8043	Recycle and source separate for various types of magnetic recording media: computer tape, VHS, diskettes, data cartridges and cassettes	
RAYLEX COMPANY LTD. 5450 Fairview Street Burlington, Ontario L7L 5N5 Frank Esposito (416)681-7110 Fax: (416)681-7221	Pickup and recycle fluorescent lamps. Extract and re-distribute mercury from lamps. Market processing units for industrial, commercial and institutional use.	

Company Information	Services	September 1992
THE SALVATION ARMY 94 York Boulevard Hamilton, Ontario L8R 1R6 (416)527-2755 Fax: N/A	Accept or pickup various clothing, furniture, dishes, small appliances, etc.	

Baler - A machine that compacts waste materials into bundles to reduce volume and retains them in this compacted form to reduce transportation costs.

Biodegradation - A natural process involving the assimilation or consumption of a material by living micro-organisms.

Biodegradable Material- Waste materials capable of being broken down by bacterial or microbe action.

Bottom Ash - The residue which remains at the bottom of an incinerator after waste is burned. It can be used in building materials such as concrete and road beds.

British Thermal Unit (BTU) - The unit of heat required to raise the temperature of one pound of water by one degree Fahrenheit. In resource recovery systems, BTU indicates the amount of heat energy produced from burning a given amount of waste.

Buy-Back Centres & Programs - Facilities or programs where individuals return recyclable materials to processors for payment.

Classification/ Sortation- Sorting of materials into uniform categories or classes, such as plastics, glass, aluminum, steel and paper, as part of the recycling process.

Coding - In the context of waste, coding refers to a system used to identify recyclable materials. The coding system for plastic packaging, a mobius loop with a number in the centre and letters underneath, indicates the resin from which each container is made. The code is moulded into the bottom of the bottles to help recycling sorters identify the different resins.

Collection - The act of picking up waste materials at home, businesses or industrial sites and hauling them to a recycling facility, energy recovery plant, or a landfill.

Collection Centre - A facility where secondary material is collected, usually from the public, and then resold to brokers or manufacturers for recycling.

Commingled Plastics - A mixture of two or more different types of plastic materials. Technology now exists to recycle commingled plastics into useful products.

Compactor - Power-driven mechanical equipment that densifies (compresses and reduces the volume of) waste materials. Compactors, which are often installed on residential and commercial refuse trucks, contain material under pressure and will not allow it to expand until it's unloaded.

Composting - A process through which organic waste materials are reduced to humus through biodegradation.

Certificate of Approval (C of A) - A legal document which is required for the operation of any waste management facility under the Ontario Environmental Protection Act.

Contaminant - Foreign material that makes a primary material impure and reduces or eliminates its recycling value.

Cover Material - A backfill, usually dirt or ash and free of organic matter, used to cover compacted waste in a sanitary landfill. If there is insufficient soil cover available, then plastic foam sprays can be applied in some locations.

Cullet - Broken glass that can be remelted into new glass products.

Curbside Pickup/Collection- Selected recycling materials are collected at the curb, usually from specially designated bins (i.e. blue boxes), for distribution to appropriate processing facilities.

Degradable Plastics - Plastics specifically developed or formulated to break down after exposure to sunlight or microbes. For example, beverage pack rings are now made from photodegradable plastic. Self-dissolving surgical sutures have also been developed to biodegrade within the body.

Deposit/Returns - Established in various parts of Canada to help reduce litter. A deposit is paid when purchasing items such as beverages and then is refunded when the containers are returned.

Disposal - The final disposition of wastes, either through incineration or landfilling.

Drop-off Recycling Centres - Facilities, often unattended bins, where individuals can deposit recyclable materials such as plastics, metals, glass and newspapers.

Dump - An open, unmanaged site where garbage is buried or left to decompose. Many dumps, now closed because of environmental problems, have been replaced with modern sanitary landfills.

Energy From Waste (EFW) - The concept of burning waste in an incinerator and using the released energy to make steam or to generate electricity which could be used in a variety of ways (eg. to heat buildings).

Energy Recovery-The recovery of energy from a combustion process in useable forms such as heat or electricity.

Environment-The Earth and its atmosphere; sometimes called the biosphere.

Fly Ash- Non-combustible particulates generated when burning waste materials. Modern incinerators are equipped to capture fly ash and prevent it from entering the atmosphere. Fly ash is often toxic and causes disposal problems (eg. due to incomplete combustion).

Groundwater - Water which exists in underground passageways in rocks and which flows in response to gravity; often the source of water for communities.

Heavy Metals - A group of metals including aluminum, zinc, chromium, nickel, copper, tin, silver, antimony, cadmium, arsenic, lead, mercury, iron, and cobalt. These materials, due to their persistence in the environment, tend to contaminate the ecosystems's food web. Heavy metals are often present in the fly ash of incinerators and the leachate from landfill sites.

Humus - Nutrient-rich material resulting from the natural decay of organic material in the soil; similar to compost.

Incinerator - A plant designed to reduce waste volume through combustion. Modern incinerators recover energy from the combusted waste.

Incinerator Ash - The post combustion residue. Bottom ash is removed through a bottom grate and fly ash is removed in the air pollution control equipment (typically an electrostatic precipitator or a bag-house filter system).

Landfill - Land used for disposal of waste (see sanitary landfill).

Leachate - The liquid which results when rain or melting snow percolates through a material and carries with it dissolved materials picked up as it moves. Depending on the location, leachate may contain hazardous materials which could contaminate groundwater or surface water. Leachate contains more heavy metals if the rain or snow is acidic.

Litter - Waste that has not been properly disposed of, either by placing it in a place or container specifically designed for that purpose, or recycling it.

Manual Separation- Separation of waste materials by hand, either in the home or office, or in a waste recovery plant. (Also known as hand sorting).

Materials Recovery - A process of waste handling that separates out reusable and recyclable materials such as plastics, metals, glass, and certain grades of paper.

Methane - A naturally occurring gas produced when organic material biodegrades without the presence of sufficient oxygen. It is often mixed with other gases. Because methane is foul, flammable and can migrate through soil, it can cause problems at landfill sites or in the surrounding area. It can be collected and used for the generation of heat and electricity.

Mobius Loop - The Mobius Loop symbolizes the endless use and reuse of materials. The three arrows refer to solids, liquids and gases; the three kinds of recyclable materials. Named after August Mobius, a German mathematician who died in 1868.

Municipal Solid Waste (MSW) - More commonly referred to as garbage, this waste material is handled by municipal collection and/or disposal services. It includes two main types of solid waste: residential waste and industrial, commercial and institutional waste. Municipal solid waste does not include hazardous and liquid

industrial waste. Also known as garbage, refuse, rubbish and trash. Different municipalities make legal distinctions among these terms, but they are all forms of municipal solid waste.

Packaging Materials- Any of a variety of plastics, papers, cardboard, metals, ceramics, glass, wood and paperboard used to make containers for foods, household and industrial products.

Plastics - A very large number of different, synthetic, organic compounds, usually made from products of oil/petroleum industry. Different plastics have a great variety of properties and, thus, have many kinds of applications. Because there are so many kinds of plastics, it is often difficult to include them in community recycling programs.

Primary Material - Virgin or new material used for manufacturing basic products.

Reclamation - The process of restoring materials found in the waste stream to usefulness or productivity. Reclaimed materials may be used for purposes other than their original use.

Recycling - Physically, chemically or biologically reprocessing solid or liquid waste in order to use the material to make a new product. A recycling program involves much more than just the actual reprocessing. It involves also the continuous separation, collection and/or cleaning of the recyclable materials and the maintenance of stable markets for the recyclable materials and useful final end-products.

Resource Recovery - Any process that extracts value from collected waste. eg. recycling or burning as a fuel to generate energy.

Resource Recovery Facility - Also called an energy recovery or energy from waste plant. A facility where solid waste is converted into some form of usable energy or fuel.

Sanitary Landfill - A method of waste disposal designed to reduce hazards to human safety and the environment. For environmental reasons many sanitary landfills are equipped with heavy plastic liners, leachate collection systems and gas capture/venting systems. Sanitary landfills can be reclaimed after reaching their waste capacity for recreation and parklands.

Separation - Division of waste into groups of similar materials, either manually or mechanically with specialized equipment. Recycled plastic packaging has been coded to make the separation process easier (see coding).

Single Service Packaging - Materials manufactured for a single use, such as foam plastic or paper cups used in food service establishments and health care centres.

Source Reduction - A way of reducing waste byproducts by using less material or fewer materials in the manufacture of products.

Source Separation - The purposeful

segregation of used materials from municipal waste into specific material categories at the point of generation, or where the waste is created. The generator may separate recyclables from other waste, but further sorting may be required. Some municipalities further sort recyclables into separate compartments in the collecting trucks; others co-mingle the recyclables for sorting at another location.

Tipping Fee - The cost charged to dispose of waste at the disposal area such as a landfill or waste-to-energy facility. Usually stated in dollars-per-tonne.

Transfer Station - A facility where waste is moved from smaller collection vehicles into larger, more cost-effective transportation units like railroad cars, barges or truck trailers.

Virgin Materials - Any basic (raw) material for industrial processing which has not been previously used.

Volume Reduction - The processing of waste materials to decrease the amount of space they occupy, usually by crushing, shredding, incineration or composting.

Waste Management - The entire process of collecting, sorting processing, recycling, reclaiming and disposing of waste.

SOME COMMONLY USED ABBREVIATIONS

C of A	Certificate of Approval
EFW	Energy From Waste
EA	Environmental Assessment
EAA	Environmental Assessment Act
EPA	Environmental Protection Act
HHW	Household hazardous waste
ICI	Industrial, Commercial and Institutional
MRF	Material Recovery Facility
MSW	Municipal Solid Waste
NIMBY	"Not In My Backyard"
OCC	Old Corrugated Cardboard
ONP	Old Newsprint
PAH	Polycyclic Aromatic Hydrocarbons
PCB	Polychlorinated biphenyl
PET	Polyethylene terphathalate
PS	Polystyrene

OMMRI - CORPORATIONS IN SUPPORT OF RECYCLING
40 King Street West, Suite 3005
Toronto, Ontario
M5H 3Y2
(416)594-3456 Fax: (416)594-3463

OMMRI assists the private sector in reducing the amount of garbage disposed of in Ontario. OMMRI members are helping to achieve a reduction in Ontario's municipal waste stream through practices which encourage recyclability and recycled content. The corporation is primarily involved with blue box programs and has limited participation in ICI activities.

ONTARIO WASTE EXCHANGE (OWE)
CANADIAN WASTE MATERIALS EXCHANGE (CWME)
c/o Ortech International
2395 Speakman Drive
Mississauga, Ontario
L5K 1B3
(416)822-4111 Fax: (416)823-1446

The OWE and CWE assist the IC&I Sectors find technologies and guidelines to minimize waste, users for waste (waste exchange) and recyclers for waste. They are also part of a joint project with the Ministry of the Environment , the Ontario Waste Management Corporation and the Canadian Waste Materials Exchange to help industries find practical ways to manage their wastes.

ONTARIO WASTE MANAGEMENT ASSOCIATION (OWMA)
4195 Dundas Street West, Suite 320
Etobicoke, Ontario
M8X 1Y4
(416)236-0172 Fax: (416)236-0174

The OWMA actively promotes the continued development of a strong private waste management industry which plays an integral role in safeguarding the public interest and achieving Ontario's environmental objectives in the most efficient and effective manner. OWMA member companies carry out this role by providing a full range of professional and environmental services and facilities in waste management and material recovery.

ONTARIO WASTE MANAGEMENT CORPORATION (OWMC)
2 Bloor Street West, 11th Floor
Toronto, Ontario
M4W 3E2
(416)923-2918 Fax: (416)923-7521

The (OWMC) is a provincial Crown agency mandated to reduce, treat and dispose of hazardous waste. OWMC was created in 1981 to ensure that the public interest is protected against the short and long-term effects of hazardous wastes.

RECYCLING COUNCIL OF ONTARIO (RCO)
489 College Street, Suite 504
Toronto, Ontario
M6G 1A5
(416)960-1025 Fax: (416)960-8053
1(800)263-2849

The RCO is a non-profit organization comprised of multi-stakeholders founded in 1978. The RCO provides a number of services including: advocating the conserver society ethic, increase public adoption of 3Rs, develop new recycling systems, perform technical research leading to practical solutions, provide educational material to schools, provide council to government, industry and specific interest groups and facilitate dialogue between diverse segments of society.

REGIONAL MUNICIPALITY OF HAMILTON-WENTWORTH
Environmental Services Department, Waste Management Division, Industrial Waste Section
35 King Street East, 4th Floor
Park Place
Hamilton, Ontario
L8N 4A9
(416)546-4423 Fax: (416)546-4494

The Environmental Services Department, Waste Management Division is responsible for the planning and administration of the Region's waste management program including recycling, incineration, landfill operations and the administration of Sewer Use Control By-Laws.

THE COMPOSTING COUNCIL OF CANADA (CCC)
275 MacLaren Street
Ottawa, Ontario
K2P 0L9
(613)238-4014 Fax:(613)230-4143

The CCC serves as a forum for those committed to discovering lasting solutions in waste management to work together to advance composting as a safe and effective method for recovery and reusing organic waste. The council is a multi-stakeholder organization and has four regional committees, including one in Ontario.

WASTE REDUCTION ADVISORY COMMITTEE (WRAC)
40 St. Clair Ave. West, 4th Floor
Toronto, Ontario
M4V 1M2
(416)314-9245 Fax: (416)314-9250

WRAC's mission is derived from Order-in-Council which sets out the Committee's role, responsibilities, and basic structure. The Order-in-Council indicates that WRAC has a mandate to provide independent waste management advice to the Minister of the Environment on reduction, reuse, recycling, and composting of residential, commercial, institutional, and industrial non-hazardous solid waste and household hazardous waste across Ontario. WRAC is to provide this advice based on the broad experience of its members, who represent special interests and expertise in waste reduction.
